FULL PAPERS

PAGE

Biosynthesis and Degradation

Fatty acid synthesis in the regenerating liver of the rat.
By C. D. Gove & D. A. Hems 1

Comparison of the metabolism of chylomicrons and chylomicron remnants by the perfused liver.
By R. S. Gardner & P. A. Mayes 47

The mode of action of alpha sarcin and a novel assay of the puromycin reaction.
By A. N. Hobden & E. Cundliffe 57

Nature of collagens synthesized by monkey periodontal-ligament fibroblasts *in vitro*.
By H. F. Limeback, J. Sodek & D. M. Brunette 63

Glycerolipid biosynthesis in rat adipose tissue. Influence of adipose-cell size and site of adipose tissue on triacylglycerol formation in lean and obese rats.
By S. C. Jamdar 153

Bioenergetics

Changes in the response of mitochondrial calcium transport to exogenous phosphate during development in flight muscle of the sheep blowfly *Lucilia cuprina*.
By R. L. Smith & F. L. Bygrave 81

Properties of energy-dependent calcium transport by rat liver microsomal fraction as revealed by initial-rate measurements.
By F. L. Bygrave 87

Subcellular Structures

Transport of phosphoenolpyruvate through the erythrocyte membrane.
By N. Hamasaki, I. S. Hardjono & S. Minakami 39

Cellular site and state of combination of the adenosine 3′:5′-cyclic monophosphate persisting after excitation of cerebral tissues.
By M. Newman & H. McIlwain 73

Cellular Interactions and Control Processes

Regulation of the synthesis of lutropin-induced protein in rat testis Leydig cells.
By F. H. A. Janszen, B. A. Cooke, M. J. A. van Driel & H. J. van der Molen 9

PAGE

The pentose phosphate pathway in regenerating skeletal muscle.
By K. R. Wagner, F. C. Kauffman & S. R. Max 17

Mode of action of α-chlorohydrin as a male anti-fertility agent. Inhibition of the metabolism of ram spermatozoa by α-chlorohydrin and location of block in glycolysis.
By P. D. C. Brown-Woodman, H. Mohri, T. Mohri, D. Suter & I. G. White 23

The relationship between vitamin D-stimulated calcium transport and intestinal calcium-binding protein in the chicken.
By R. Spencer, M. Charman, P. W. Wilson & D. E. M. Lawson 93

Phosphorus nuclear-magnetic-resonance studies of compartmentation in muscle.
By S. J. W. Busby, D. G. Gadian, G. K. Radda, R. E. Richards & P. J. Seeley 103

Testosterone regulates the synthesis of major proteins in rat ventral prostate.
By M. G. Parker, G. T. Scrace & W. I. P. Mainwaring 115

Ornithine decarboxylase activity and the onset of deoxyribonucleic acid synthesis in regenerating liver.
By J. A. McGowan & N. Fausto 123

Effect of hepatic injury on prolyl 3-hydroxylase and 4-hydroxylase activities in rat liver and on immunoreactive prolyl 4-hydroxylase concentrations in the liver and serum.
By J. Risteli, L. Tuderman, K. Tryggvason & K. I. Kivirikko 129

The effect of copper excess on iron metabolism in sheep.
By E. C. Theil & K. T. Calvert 137

Detection and separation of lymphocytes with specific surface receptors, by using microparticles.
By I. Ljungstedt, B. Ekman & I. Sjöholm 161

Development

Studies on the mitochondrially bound form of rat brain creatine kinase.
By R. F. G. Booth & J. B. Clark 145

RAPID PAPERS

PAGE

Biosynthesis and Degradation

The metabolic fate of glutamine nitrogen in the perfused rat kidney.
By B. D. Ross & S. Bullock 177

Oestriol-stimulated synthesis of ribonucleic acid in the uterus of the immature rat.
By J. T. Knowler 181

Synthesis of the guinea-pig cardiac myosin as measured by constant infusion.
By L. E. Wyborny, E. M. Kritcher & R. J. Luchi 189

PAGE

Cellular Interactions and Control Processes

Lipoprotein lipase activity in the tissues of guinea pigs exposed to different dietary fats from conception to three months of age.
By A. Cryer, J. Kirtland, H. M. Jones & M. I. Gurr 169

Subcellular distribution of pyruvate (glyoxylate) aminotransferases in rat liver.
By T. Noguchi, Y. Minatogawa, Y. Takada, E. Okuno & R. Kido 173

Surface glycosaminoglycans and calcium distribution in 3T3 cells.
By S. Vannucchi, M. del Rosso, C. Cella, P. Urbano & V. Chiarugi 185

Contents of Volume 170, No. 2

FULL PAPERS

PAGE

Biosynthesis and Degradation

Effect of potassium deficiency on mouse kidney lysosomal enzymes.
By C. E. Cleveland & R. T. Swank 249

Uptake and metabolism of adenosine by pig aortic endothelial and smooth-muscle cells in culture.
By J. D. Pearson, J. S. Carleton, A. Hutchings & J. L. Gordon 265

The formation of lipid-linked sugars as intermediates in glycoprotein synthesis in rabbit mammary gland.
By B. K. Speake & D. A. White 273

The mechanism of haem catabolism. Bilirubin formation in living rats by [^{18}O]oxygen labelling.
By S. B. Brown & R. F. G. J. King 297

Evidence from mycelial studies for differences in the sterol biosynthetic pathway of *Rhizoctonia solani* and *Phytophthora cinnamomi*.
By S. G. Wood & D. Gottlieb 343

Evidence from cell-free systems for differences in the sterol biosynthetic pathway of *Rhizoctonia solani* and *Phytophthora cinnamomi*.
By S. G. Wood & D. Gottlieb 355

PAGE

Synthesis of ophthalmic acid in liver and kidney *in vivo*.
By M. Orlowski & S. Wilk 415

Labelling of glycerolipids in the cotyledons of developing oilseeds by [1-^{14}C]acetate and [2-^{3}H]glycerol.
By C. R. Slack, P. G. Roughan & N. Balasingham 421

Bioenergetics

Quantitative electron-paramagnetic-resonance measurements of the electron-transfer components of the photosystem-I reaction centre. The free-radical signal I and the bound iron–sulphur centre A.
By D. L. Williams-Smith, P. Heathcote, C. K. Sihra & M. C. W. Evans 365

Quantitative electron-paramagnetic-resonance measurements of the electron-transfer components of the photosystem-I reaction centre. The reaction-centre chlorophyll (P700), the primary electron acceptor X and bound iron–sulphur centre A.
By P. Heathcote, D. L. Williams-Smith & M. C. W. Evans 373

GENERAL BOOKBINDING CO.
237AA 013 C
70 2 1 2160
QUALITY CONTROL MARK

PAGE

The oxidative activities of membrane vesicles from *Bacillus caldolyticus*. Energy-dependence of succinate oxidation.
By A. G. Dawson & J. B. Chappell 395

Cellular Interactions and Control Processes

Androgenic regulation of elongation of polyribonucleotide chains on rat ventral-prostate chromatin.
By P. Thomas, P. Davies & K. Griffiths 211

Induction of cadmium-thionein in isolated rat liver cells.
By H. A. Hidalgo, V. Koppa & S. E. Bryan 219

Effects of pent-4-enoate on cellular redox state, glycolysis and fatty acid oxidation in isolated perfused rat heart.
By J. K. Hiltunen, V. P. Jauhonen, M. J. Savolainen & I. E. Hassinen 235

Metabolic effects of pent-4-enoate in isolated perfused rat heart.
By J. K. Hiltunen 241

Studies on secretion and endocytosis of macromolecules by cultivated skin fibroblasts. Effects of anti-microtubular agents on secretion and endocytosis of lysosomal hydrolases and of sulphated glycosaminoglycans.
By K. von Figura, H. Kresse, U. Meinhard & D. Holtfrerich 313

Oestrogen induction of riboflavin-binding protein in immature chicks. Nature of the secretory protein.
By U. S. Murthy & P. R. Adiga 331

Interrelations between ureogenesis and gluconeogenesis in isolated hepatocytes. The role of anion transport and the competition for energy.
By A. B. Wojtczak, E. I. Wałajtys-Rode & M. J. H. Geelen 379

PAGE

Poly(adenosine diphosphate ribose) metabolism and regulation of myocardial cell growth by oxygen.
By Q. P. Ghani & M. Hollenberg 387

Development

Changes in the lactate dehydrogenase isoenzyme pattern during differentiation of rabbit bone-marrow erythroid cells.
By M. S. Setchenska & H. R. V. Arnstein 193

Studies on sex-organ development. Changes in chromatin structure during spermatogenesis in maturing rooster testis as demonstrated by the initiation pattern of ribonucleic acid synthesis *in vitro*.
By C. Mezquita & C. S. Teng 203

Lipid oxidation by heart mitochondria from young adult and senescent rats.
By R. G. Hansford 285

Intestinal neuraminidase activity of suckling rats and other mammals. Relationship to the sialic acid content of milk.
By J. J. Dickson & M. Messer 407

Metabolism in Whole Organisms

Vitamin D metabolism and expression in rats fed on low-calcium and low-phosphorus diets.
By S. Edelstein, D. Noff, L. Sinai, A. Harell, J. B. Puschett, E. E. Golub & F. Bronner 227

The metabolism of shikimate in the rat.
By D. Brewster, R. S. Jones & D. V. Parke 257

Inter-organ relationships between glucose, lactate and amino acids in rats fed on high-carbohydrate or high-protein diets.
By C. Rémésy, C. Demigné & J. Aufrère 321

The effects of hypoglycin on glucose metabolism in the rat. A kinetic study *in vivo* with [U-^{14}C,2-^{3}H]glucose.
By H. Osmundsen, D. Billington, J. R. Taylor & H. S. A. Sherratt 337

RAPID PAPERS

PAGE

Biosynthesis and Degradation

Transformation of arachidonate into 6-oxo-prostaglandin $F_{1\alpha}$, thromboxane B_2 and prostaglandin E_2 by sheep lung microsomal fraction.
By H.-H. Tai, B. Yuan & A. T. Wu 441

PAGE

Cellular Interactions and Control Processes

Rapid temperature-induced changes in the fatty acid composition of certain lipids in developing linseed and soya-bean cotyledons.
By C. R. Slack & P. G. Roughan 437

Calcitonin-mediated changes in plasma tryptophan and brain 5-hydroxytryptamine and acetylcholinesterase activity in rats.
By A. M. Nakhla & A. P. Nandi Majumdar 445

Contents of Volume 170, No. 3

FULL PAPERS

PAGE

Biosynthesis and Degradation

The formation of lipid-linked sugars by cell-free preparations of lactating rabbit mammary gland.
By D. A. White 479

The biochemical pathway for the breakdown of N^4-ethyl-L-asparagine in the bacterium *Pseudomonas stutzeri*.
By R. W. Dineen & D. O. Gray 487

Comparative studies on the 25-hydroxylations of cholecalciferol and 1α-hydroxycholecalciferol in perfused rat liver.
By M. Fukushima, Y. Nishii, M. Suzuki & T. Suda 495

Proinsulin biosynthesis in broken-cell preparations of islets of Langerhans.
By D. G. Parry & K. W. Taylor 523

Conversion of choline methyl groups through trimethylamine into methane in the rumen.
By A. R. Neill, D. W. Grime & R. M. C. Dawson 529

The rate of deoxyribonucleic acid synthesis by cultured Chinese-hamster ovary cells. An application of isotope-dilution analysis.
By F. W. Scott & D. R. Forsdyke 545

The lability of the products of mitochondrial protein synthesis in *Saccharomyces cerevisiae*. A novel method for protein half-life determination.
By G. Y. Bakalkin, S. L. Kalnov, A. V. Galkin, A. S. Zubatov & V. N. Luzikov 569

The structure and function of glycoproteins synthesized during slime-polysaccharide production by membranes of the root-cap cells of maize (*Zea mays*).
By J. R. Green & D. H. Northcote 599

Recovery from vitamin B-12-induced unbalanced growth. The shortened cell cycle and the deoxyribonucleoside triphosphate pools.
By G. H. Goetz & E. F. Carell 631

Protein degradation rates in regions of the central nervous system *in vivo* during development.
By D. S. Dunlop, W. van Elden & A. Lajtha 637

PAGE

Proline metabolism in isolated rat liver cells.
By H. E. S. J. Hensgens, A. J. Meijer, J. R. Williamson, J. A. Gimpel & J. M. Tager 699

Bioenergetics

Citreoviridin, a specific inhibitor of the mitochondrial adenosine triphosphatase.
By P. E. Linnett, A. D. Mitchell, M. D. Osselton, L. J. Mulheirn & R. B. Beechey 503

Calcium transport and proton electrochemical potential gradient in mitochondria from guinea-pig cerebral cortex and rat heart.
By D. G. Nicholls 511

Calcium-ion transport by intact Ehrlich ascites-tumour cells. Role of respiratory substrates, P_i and temperature.
By R. R. Charlton & C. E. Wenner 537

The microbial metabolism of C_1 compounds. The stoicheiometry of respiration-driven proton translocation in *Pseudomonas* AM1 and in a mutant lacking cytochrome *c*.
By D. T. O'Keeffe & C. Anthony 561

Genetic complementation between two mutant *unc* alleles (*uncA401* and *uncD409*) affecting the F_1 portion of the magnesium ion-stimulated adenosine triphosphatase of *Escherichia coli* K12.
By G. B. Cox, J. A. Downie, F. Gibson & J. Radik 593

Proton translocation by the bovine chromaffin-granule membrane.
By J. H. Phillips & Y. P. Allison 661

5-Hydroxytryptamine transport by the bovine chromaffin-granule membrane.
By J. H. Phillips 673

Contribution of cytochromes and proteins to the effect of ascorbic acid on artificial and microsomal hydroxylation systems containing oxygen and hydrogen peroxide.
By J. Chrastil & J. T. Wilson 693

Subcellular Structures

Evidence for lysosomal enzyme recognition by human fibroblasts via a phosphorylated carbohydrate moiety.
By K. Ullrich, G. Mersmann, E. Weber & K. von Figura 643

PAGE

Cellular Interactions and Control Processes

Metabolic signals produced by purine ribonucleosides stimulate proinsulin biosynthesis and insulin secretion.
By K. Jain & J. Logothetopoulos 461

Differential activation of type-I and type-II adenosine 3′:5′-cyclic monophosphate-dependent protein kinases in liver of glucagon-treated rats.
By G. Schwoch 469

Inhibition of lactate gluconeogenesis in rat kidney by dichloroacetate.
By J. H. Lacey & P. J. Randle 551

Regulation of the oxidative phase of the pentose phosphate cycle in mussels.
By S. Rodriguez-Segade, M. Freire & A. Carrion 577

Effect of L-alanine infusion on gluconeogenesis and ketogenesis in the rat *in vivo*.
By P. T. Ozand, W. D. Reed, R. L. Hawkins, J. H. Stevenson, J. T. Tildon & M. Cornblath 583

PAGE

Control of glucose metabolism in isolated acini of the lactating mammary gland of the rat. Effects of oleate on glucose utilization and lipogenesis.
By A. M. Robinson & D. H. Williamson 609

Calcium metabolism in rat hepatocytes.
By S. Foden & P. J. Randle 615

Maintenance of glutathione content in isolated hepatocytes.
By J. Viña, R. Hems & H. A. Krebs 627

Effects of aliphatic diamines on rat liver ornithine decarboxylase activity.
By A. E. Pegg, C. Conover & A. Wrona 651

Stimulation of precipitation of calcium phosphate by matrix vesicles.
By R. Felix, W. Herrmann & H. Fleisch 681

Development

Comparison of α-methylphenylalanine and *p*-chlorophenylalanine as inducers of chronic hyperphenylalaninaemia in developing rats.
By J. A. DelValle, G. Dienel & O. Greengard 449

RAPID PAPERS

PAGE

Subcellular Structures

The identification of glycoproteins associated with elastic-tissue microfibrils.
By C. H. J. Sear, M. A. Kewley, C. J. P. Jones, M. E. Grant & D. S. Jackson 715

PAGE

Cellular Interactions and Control Processes

Reaction of formiminoglutamate with liver glutamate dehydrogenase.
By J. Viña, R. Hems & H. A. Krebs 711
